Resolution of the GCGW-2026 Conference

Taking into account the presentations delivered, scientific discussions held, proposals put forward, and outcomes of the exchange of views during the plenary meetings and thematic sessions of the GCGW-2026 Conference, the Conference resolves:

1. Based on the scientific presentations delivered, priority research areas and cooperation opportunities shall be identified, and the establishment of an international network of researchers within the framework of the “Twin Researchers” approach shall be encouraged.

2. The scientific scope of the conference shall be expanded, and consideration shall be given to including current areas of engineering, alongside global warming and climate change, in the programs of future conferences.

3. Measures shall be taken to ensure the indexing of conference materials in international scientific information and scientometric databases and to align the peer-review and publication processes with international standards.

4. Efforts shall continue to hold the GCGW Conference regularly at Azerbaijan Technical University, expand the geographic representation of international participants, and involve leading universities and research institutions.

5. The possibility of publishing selected conference materials of high scientific significance in a special issue or special edition of an appropriate AzTU scientific journal shall be explored.

6. The scientific focus of future conferences shall be determined with due consideration for contemporary global challenges, sustainable development, and emerging trends in engineering.

7. The international scientific ties established within the framework of the conference shall be further developed through joint research projects, international grant applications, scientific publications, and academic mobility programs.

8. The outcomes of the conference shall be used to strengthen AzTU’s international scientific standing, research collaborations, and participation in global scientific networks.

9. The establishment of joint research groups in priority areas and the involvement of young researchers and doctoral students in international scientific cooperation shall be supported.

10. The Conference Scientific Committee shall be entrusted with coordinating activities arising from this Resolution and preparing proposals for the scientific program of the next GCGW Conference.
